

# Professional Services

*Our Professional Services organization has the knowledge and expertise to help make your project successful!*

## **Planning and Design**

Viaserv's long experience in the middleware industry makes it uniquely positioned to provide assistance in the planning and design of distributed computing environments. We'll help you understand the in's and out's of the various options and architectures, so that you can build the system that's right for you.

## **On-site Installation**

For customers who would like extensive assistance when installing Viaserv products, we provide the on-site implementation and consulting services you need. Services include installation, configuration, application development, RSP and CSA coding, performance tuning, and systems planning.

## **Integration Services**

Need help with network setup, additional hardware requirements, or with the installation of other related software components? We can pull it all together for you.

## **Training**

On-site or Boulder-based training is available on a fee basis. Training is geared to provide a fast start in system implementation, and can be our standard offering, or can be customized to meet your specific needs.
